FUND COMMENTARY

AlphaNorth Growth Fund

October 2015

NAV
Series A (ANF010) \$2.167
Series F (ANF011) \$2.245

Fund Review The Fund returned (1.7%) in October. This compared to 3.3% for the TSX Venture and 2.0% for the TSX Total Return index.

Vogogo Inc. (TSXV:VGO) announced its first contract with a customer outside of the cryptocurrency space, Easy Payment Gateway. Market reaction was lackluster; however, we believe that the implications of this deal are much larger than investors realize. While the market for cryptocurrency payment processing is quite large as it is, VGO is actually seeing a lot of interesting opportunities outside that space, including opportunities from payment processors and banks. The fact that these highly regulated players are turning to Vogogo for fraud prevention and detection indicates the power of the company's technology. Moreover, this deal reaffirms the notion that the company's addressable market is significantly larger than cryptocurrency on its own. We expect further announcements from VGO in regards to new contracts, partnerships, and licenses prior to year-end. It is hard to predict which of these catalysts will be the trigger for a strong share price move.

The current sector mix is comprised of 44% in technology, 0% in health care, 0% in financials, 33% in consumer discretionary, 13% in energy and 9% in materials.

Outlook We continue to hold an optimistic outlook for global growth. This is important for equities because periods of accelerating global growth are generally positive for equity returns. This is particularly important for Canadian stocks as they are more heavily weighted to the resource sectors which are closely tied to global growth. Several economic and strategy reports that we have read recently, highlight several factors supportive of accelerating global growth. These include the stimulus from low commodity prices and interest rates, high and improving PMI surveys, and a cyclical upturn from the latest inventory correction. We also point to improvements in a variety of meaningful indicators in China such as electricity output, freight volumes and passenger traffic as better indicators to gauge the strength of the Chinese economy as compared to the broad based China GDP which is widely followed.

In our portfolios, we have identified and selected a diverse range of unique high growth potential companies which we believe position us 'ahead of the pack' to experience the biggest gains as the junior market recovers. The best performing months of the year historically for the Canadian junior market are December, January and February.

Investment Strategy

The **AlphaNorth Growth Fund** (the "Fund") is an **open-ended mutual fund** focusing primarily on Canadian small to mid-capitalization equities, between \$100 million and \$5 billion market capitalization. The Fund employs a similar style and investment methodology as the highly successful AlphaNorth Partners Fund. The Fund's investment objective is to maximize returns over the long term through superior selection of principally Canadian securities. AlphaNorth believes that superior long term investment returns are achievable by exploiting inefficiencies in the Canadian small to medium-cap universe through careful security selection. Fundamental analysis of companies is used in combination with technical analysis techniques, have proven to be successful, to assist in the timing of buy/sell decisions. The firm combines both a bottom-up and top-down strategy in the selection of investments offering the best risk/reward characteristics.

Company Profile

Founded in 2007, AlphaNorth Asset Management's goal is to achieve superior long term returns for investors. Our value added approach combines the successful track record and investment experience of Steven Palmer and Joey Javier who have worked together as a team since 1998 in the investment industry. Presently, AlphaNorth manages the AlphaNorth Partners Fund, a long biased small cap focused hedge fund, the AlphaNorth Resource Fund and the AlphaNorth Growth Fund.
