## AlphaNorth Growth Fund

February 2016

NAV  
Series A (ANF010) \$1.783  
Series F (ANF011) \$1.850

### Fund Review

The Fund returned (5.2%) in February. This compared to 8.5% for the TSX Venture and 0.5% for the TSX Total Return index.

February was a disappointing month in the context of the positive returns for the Canadian indices. Short term swings are hard to predict and control for small/mid cap investments. March returns are off to a much better start.

During the month of February we added exposure in the Health Care sector with a new position in Spectral Medical (TSXV:EDT). The company is nearing completion of a phase III trial for the treatment of severe sepsis. Sepsis is a life threatening condition caused by the body's response to infection. There are one million cases in the U.S. each year and results in a high mortality rate and treatment cost to the healthcare system. We like the risk/reward of this investment because we believe it has high odds of success, high insider ownership, a near term catalyst, large \$3 billion market and the company is well financed.

We believe it is an opportune time to add exposure to the energy sector. We plan to do this in the near term while reducing exposure to the consumer discretionary sector. The small fund size allows us to make significant changes like this in a quick and efficient manner.

The current sector mix is comprised of 31% in technology, 6% in health care, 0% in financials, 44% in consumer discretionary, 6% in energy and 10% in materials.

**Outlook** The technical and sentiment indicators which we have been monitoring in recent weeks have given us increased confidence in our bullish outlook for equities. We are also encouraged by the YTD outperformance of the TSX Venture Index which has been one of the top performing equity indices worldwide. The larger cap TSX Composite has also begun to outperform the U.S. indices after an extended period of underperformance. A rebound in the C\$ from the 68 cent level to approximately 75 cents over the same period accentuates the strong performance of the Canadian indices. Although these performance numbers are over a relatively short period of time, we believe the risk/reward favours a continuation of this trend.

We highlighted several sentiment indicators which we viewed as very positive for equity markets last month. We recently prepared a more detailed document which highlights the opportunity for Canadian small caps. We strongly encourage investors to review this document ([What is Recent Investor Sentiment Implying for Equity Markets?](#)).

Canadian small caps have recovered slightly in recent weeks but remain at depressed valuations and sentiment continues to be very poor. We believe there remains a high number of tremendous opportunities which we have identified which could experience exceptional returns. Early investors will have the greatest returns with the lowest risk. **The AlphaNorth funds are well positioned to capitalize on a recovery in the Canadian junior markets.**

Regards,

Steven Palmer, CFA  
President and CEO

## Investment Strategy

The AlphaNorth Growth Fund (the "Fund") is an **open-ended mutual fund** focusing primarily on Canadian small to mid-capitalization equities, between \$100 million and \$5 billion market capitalization. The Fund employs a similar style and investment methodology as the highly successful AlphaNorth Partners Fund. The Fund's investment objective is to maximize returns over the long term through superior selection of principally Canadian securities. AlphaNorth believes that superior long term investment returns are achievable by exploiting inefficiencies in the Canadian small to medium-cap universe through careful security selection. Fundamental analysis of companies is used in combination with technical analysis techniques, have proven to be successful, to assist in the timing of buy/sell decisions. The firm combines both a bottom-up and top-down strategy in the selection of investments offering the best risk/reward characteristics.

## Company Profile

Founded in 2007, AlphaNorth Asset Management's goal is to achieve superior long term returns for investors. Our value added approach combines the successful track record and investment experience of Steven Palmer and Joey Javier who have worked together as a team since 1998 in the investment industry. Presently, AlphaNorth manages the AlphaNorth Partners Fund, a long biased small cap focused hedge fund, the AlphaNorth Resource Fund and the AlphaNorth Growth Fund.

### Key Personnel:
